DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 9/25/2006 has been considered by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 3 line 6 is amended as follows:

wherein the groove widths [between] of the first and the second grooves [is] are variable

Authorization for this examiner's amendment was given in a telephone interview with John Rabena on 8/18/2009.

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-9 are allowed over the prior art of record, including closest US Patents to Nakamichi (US 6097693), Ito et al (US 6907613) and US PG PUB to Nishida et al (US 2004/0057349), because the prior art of record, considered individually or in combination, fails to disclose or fairly teach a playback

Art Unit: 2627

apparatus for recording media wherein the separating device is movable in the direction of overlapping of the recording media, and includes a first member having a guiding groove on which the holder with the selected recording medium slides, and a second member movable in the direction of overlapping independently from the first member, including the limitation wherein a separating groove, on which the holders holding the other recording media slide, is formed by a relative movement between the first and the second members (claims 1-6) or wherein the separating device includes a dividable sliding wall for sliding the other holders in a direction of separating the other holders from the selected holder (claims 7-9) in combination with the other limitations of independent claims 1 and 7.

Nakamichi discloses a clamping device in a disc changer which has a threaded shaft or stocker for selecting the disc for playback (figure 10) but fails to disclose the apparatus as claimed in claims 1 or 7 as discussed above.

Ito et al discloses a disc device with a disc selection unit with a threaded shaft, and disc holders which are stacked vertically are movable, such that when a disc is selected the disc holders are moved to a position where the selected disc is engaged by the threaded shaft member (fig. 4) but fails to disclose the apparatus as claimed in claims 1 or 7 as discussed above.

Nishida et al discloses a disc device with a disc selection shaft having a spirally formed cam portion that is used to engage the selected disc (fig. 5) but fails to disclose the apparatus as claimed in claims 1 or 7 as discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2627

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Peng (US 695944) discloses an apparatus for changing optical disks. Otsuka (US 6947357) discloses a disc selection unit having a threaded shaft.

The art made of record, but not relied upon to Suzuki et al (US 20070201320), Mizoguchi et al (US 2007/0201319), and Saitou et al (US 20080040735) correspond to copending applications which do not qualify as prior art and have similar disclosures but are directed to different claimed inventions.
